**Features**

This newest addition to our LANCEGLOVES line is designed for maximum protection from the high temperatures of Thermic & Oxygen Lancing. This glove comes with the innovative "FULL PALM" reinforcement which will better shield the entire palm and the utility fingers from temporary exposure to hot objects or searing radiant heat. The extra foil-laminated layer in the palm, Kevlar® stitching, combine to give the most protection of any Lance Gloves on the market place. **KEVLAR Fleece** gives you more protection in your heavy duty work, it is fire resistant and cut resistant as well.
